

Pierrexpert

PREMIER NATURAL STONE SUPPLIER

pierrexpert.com

PIERREXPERT

WHO WE ARE

Pierrexpert started as a specialist in cutting and finishing stone products on demand. Just after the turn of the millennium, Pierrexpert decided to expand its business to provide other services in the same field using the CAD Technology for its products.

EXPERTISE

With over 30 years of experience, the company offers its expertise to more than 1,000 clients in Canada, the United States and worldwide. Through its strong relationships with teams of quarries all around the world.

FINDING SOLUTIONS

Pierrexpert has a simple goal in mind: providing excellence to their clients. Addressing their inquiries and coming up with a solution that meets their needs.

REPUTABLE

In 2003, Pierrexpert, in collaboration with StoneAdvise System in Europe, came up with a new conceptual technology: StoneAdvise Gluing System. It was developed and applied for over a decade on more than 50 different projects. During the same year, Pierrexpert received an award for “Excellence in Construction” over 4000 sq. ft.

AHSLAR

At Pierrexpert, we have natural stone cladding that comes as individual pieces and gives virtually endless possibilities to create random designs and patterns.

STONE VENEER

We can supply thin stone veneer tiles starting at $\frac{3}{4}$ " thick and up. Thin stone veneer gives you the same look and is more affordable.

BONDING SYSTEM

Using a new bonding system designed to withstand climate extremes and changes as well as to resist condensation and moisture buildup, you can enjoy outstanding performance for any vertical tile application.

Whether used on natural stone, ceramic, glass, metal or other types of tiles, installations with this gluing system can be completed in a fraction of the time that traditional anchorage systems require. It also eliminates the need for specialized contractors so it saves you even more money.

For the best in durability and longevity along with time and cost savings, the new building facade bonding system by Pierrexpert is the solution.

A | Clean the metal channel from any debris or grease.

B | Clean the vertical tile from any debris or grease.

C | Apply the adhesive to the metal channel.

D | Affix the vertical tile to the metal channel.
